

The 1987 Nissan Skyline GTS-R was the seventh generation in the Skyline fleet and raced its way into the history books. Skylines already had a reputation for their racing prowess, and this model was also designed to dominate the Japanese Touring Car Championship. The 1987 model was updated with engine upgrades and improved aerodynamics. Off the track, the Skyline also turned heads on the road. This Matchbox™ creations model puts the collector on the racetrack with racing inspired livery. It's the perfect piece to display on your podium... or mantel.
